1. **Comments By the General Public**

This is a period devoted to comments by the general public about items on **this** agenda. If you wish to speak to the Regional Flood Control District Citizens Advisory Committee about items within its jurisdiction but not appearing on this agenda, you must wait until the "Comments By the General Public" period listed at the end of this agenda. Comments will be limited to three minutes. Please step up to the speaker's podium, clearly state your name and address and please **spell** your last name for the record. If any member of the Regional Flood Control District Citizens Advisory Committee wishes to extend the length of a presentation, this will be done by the Chairman or the Regional Flood Control District Citizens Advisory Committee by majority vote.

AGENDA CLARK COUNTY REGIONAL FLOOD CONTROL DISTRICT CITIZENS ADVISORY COMMITTEE AUGUST 2, 2021 3:00 P.M.

- Items on the agenda may be taken out of order.
- The Regional Flood Control District Citizens Advisory Committee may combine two or more agenda items for consideration.
- The Regional Flood Control District Citizens Advisory Committee may remove an item from the agenda or delay discussion relating to an item on the agenda at any time.

I. Call to Order

1. **Comments By the General Public**

This is a period devoted to comments by the general public about items on **this** agenda. If you wish to speak to the Regional Flood Control District Citizens Advisory Committee about items within its jurisdiction but not appearing on this agenda, you must wait until the "Comments By the General Public" period listed at the end of this agenda. Comments will be limited to three minutes. Please step up to the speaker's podium, clearly state your name and address and please **spell** your last name for the record. If any member of the Regional Flood Control District Citizens Advisory Committee wishes to extend the length of a presentation, this will be done by the Chairman or the Regional Flood Control District Citizens Advisory Committee by majority vote.

- 2. Action to approve the agenda with deletion of any items (*For possible action*)
- 3. Action to approve the minutes of the June 28, 2021 meeting (*For possible action*)

II. Administration

- 4. Action to accept the financial reports *(For possible action)*
- 5. Action to adopt amendments to the Ten-Year Construction Program *(For possible action)*

Regional Flood Control District Citizens Advisory Committee Agenda August 2, 2021 Page 2

- 6. Action to approve and authorize the General Manager to sign amendment no. 1 to the interlocal agreement between the Southern Nevada Water Authority and the District to increase funding to fund the development of site-specific criteria for selenium in the Las Vegas Wash *(For possible action)*
- 7. Action to approve and authorize the Chair to sign the second amendment to the consultant contract with Atkins North America, Inc., to increase funding and extend the completion date to prepare an update to the Hydrologic Criteria and Drainage Design Manual *(For possible action)*

III. Design and Construction

- 8. Receive a report on the award of bid for construction for Hollywood System, Centennial Parkway to Speedway #2 Detention Basin – City of North Las Vegas
- 9. Action to approve the interlocal contracts for design for the following projects *(For possible action)*:
 - a. Sunset Park Duck Creek Wash to Eastern Avenue Clark County
 - b. Flamingo, Cimarron Branch Russell Road to Patrick Lane Clark County

10. **Comments By the General Public**

A period devoted to comments by the general public about matters relevant to the Regional Flood Control District Citizens Advisory Committee jurisdiction will be held. No vote may be taken on a matter not listed on the posted agenda. Comments will be limited to three minutes. Please step up to the speaker's podium, clearly state your name and address and please **spell** your last name for the record. If any member of the Regional Flood Control District Citizens Advisory Committee wishes to extend the length of a presentation, this will be done by the Chairman or the Regional Flood Control District Citizens Advisory Committee by majority vote. All comments by speakers should be relevant to the Regional Flood Control District Citizens Advisory Committee action and jurisdiction.

NOTE: The next scheduled Citizens Advisory Committee meeting is on <u>Monday, August 30,</u> <u>2021</u> at 3:00 p.m.

MINUTES CLARK COUNTY REGIONAL FLOOD CONTROL DISTRICT CITIZENS ADVISORY COMMITTEE JUNE 28, 2021 3:00 P.M.

These minutes are prepared in compliance with NRS 241.035. Text is in summarized rather than verbatim format. For complete contents, please refer to meeting recordings on file at the Regional Flood Control District (RFCD) offices.

MEETING NOTICES	Public Notices of this meeting were properly posted by Jacqueline Ramirez of the Regional Flood Control District in the following locations: Clark County Regional Flood Control District Building, the Clark County Regional Flood Control District Website (www.regionalflood.org), and the State of Nevada Public Notice Website (<u>https://notice.nv.gov/</u>).
CALL TO ORDER:	Mr. Ron Newell, Chair, Clark County, called the meeting to order at 3:06 p.m., in Room 108, 600 South Grand Central Parkway, with the following members present:
MEMBERS PRESENT:	Ron Newell, Chair, Clark County Bill Starmer, Vice-Chair, City of Las Vegas Norman Ashford, City of Mesquite Harshal Desai, City of Henderson (Attended via conference line) Jim Jordano, City of Henderson (Arrived at 3:10 p.m.) Larry Karr, City of Boulder City
MEMBERS ABSENT:	Karina Barragan, City of North Las Vegas James Houts, City of Boulder City Brian Wilson, City of Las Vegas Bertha Gutierrez, Clark County
STAFF:	Steven C. Parrish, General Manager/Chief Engineer Andrew Trelease, Assistant General Manager Christopher Figgins, RFCD Attorney Todd Myers, Engineering Director Jeanine Pitts-Dilworth, Administrative Services Director John Tennert, Environmental Mitigation Manager Erin Neff, Public Information Manager Abigail Mayrena, Principal Civil Engineer Brian Rowley, Principal Civil Engineer Debra Yamachika, Senior Civil Engineer Michael Todd, Systems Administrator Jessica Butte, Fiscal Services Administrator Tammy McMahan, Office Services Manager Jacqueline Ramirez, Senior Office Specialist

I. Call to Order

Mr. Ron Newell, Chair, Clark County, called the meeting to order at 3:06 p.m., in Room 108 of the RFCD/RTC Administration Building.

1. **Comments By the General Public**

There was no response to the call for Comments By the General Public.

2. Action to approve the agenda with deletion of any items (*For possible action*)

Staff recommends approval of the agenda.

Mr. Starmer moved to follow staff recommendation.

5 AYES – 0 NAYS Motion Carried

3. Action to approve the minutes of the May 27, 2021 meeting (*For possible action*)

Staff recommends approval of the minutes.

Mr. Ashford moved to follow staff recommendation.

5 AYES – 0 NAYS Motion Carried

II. Administration

4. Action to accept the financial reports *(For possible action)*

Mr. Parrish reported that Nevada sales tax receipts for April 2021 had not yet been made available. However, he noted that the monthly receipts for March 2021 had been one of the highest reported amounts for the District.

Staff recommends acceptance of the financial reports.

Mr. Ashford moved to follow staff recommendation.

5 AYES – 0 NAYS Motion Carried

- 5. Action to adopt amendments to the Ten-Year Construction Program *(For possible action)*
 - Staff recommends approval.

Mr. Starmer moved to follow staff recommendation.

5 AYES – 0 NAYS Motion Carried

***Mr. Jim Jordano arrived at the meeting at 3:10 p.m.

- 6. Action to accept the final accounting reports and close out the interlocal contracts for the following projects *(For possible action)*:
 - Muddy River West Levee, Moapa Valley (design) MOA01B89
 - Range Wash Ann Branch (design) NLV03F17

Mr. Parrish stated that construction had been completed for each project, and the interlocal contracts would be closed. He noted the close out would return \$1,050,417.61 to the fund. Mr. Karr inquired whether residual project funds were cash on hand or a budget item. Mr. Parrish informed him that residual project funds were cash on hand. He further explained that revenues are deposited into a construction fund and utilized to pay for the design and construction of projects. Mr. Parrish added that monies remaining after a project closeout become available for other design or construction projects.

Staff recommends approval.

Mr. Starmer moved to follow staff recommendation.

6 AYES – 0 NAYS Motion Carried

7. Receive the quarterly project status reports, reporting period: February 2021 through April 2021

Mr. Parrish informed the Committee that the quarterly report was featured in the agenda item back up. He further stated that the report concerned projects with open and active interlocal contracts.

No Action Required

8. Action to ratify an agreement between the Nevada Division of Environmental Protection and the District to fund field reconnaissance of tributaries to the Las Vegas Wash *(For possible action)*

Mr. Parrish stated that the District had received an \$18,000 grant from the Nevada Division of Environmental Protection (NDEP) to study tributaries leading into the Las Vegas Wash to determine if aquatic life can be supported. He added that the study constituted a step towards removing the area from the Federal Clean Water Act Section 303(d) list of impaired waters.

Staff recommends approval.

Mr. Ashford moved to follow staff recommendation.

6 AYES – 0 NAYS Motion Carried

III. Design and Construction

9. Receive a report on the award of bid for construction for Beltway Detention Basin, Collection and Outfall – City of North Las Vegas

Mr. Parrish shared that seven bids were received on August 19, 2020, by the City of North Las Vegas. He noted that the recommended best bid went to Fisher Sand and Gravel, in the amount of \$11,489,489, which was 16% lower than the engineer's estimate presented to the District's Board of Directors in May 2019. Mr. Starmer inquired about the significant differences regarding the received bid amounts. Mr. Parrish stated that the primary factor giving rise to the differences involved excavation costs, whereby one vendor's rates were significantly higher than the others. Mr. Karr inquired whether bids were typically awarded to the lowest dollar bidder or if a contractor's ability to deliver or perform on the job was considered. Mr. Parrish stated that the subject contracts were considered to be "lowest-bidder" contracts and, therefore, the lowest responsible bidder would win the contract. Mr. Parrish went on to say that other types of delivery systems were based upon qualifications, but in this case, the lowest responsible bidder was awarded the contract. Mr. Karr asked if data was available to determine a contractor's historical performance. Mr. Parrish explained that the District contracts directly with entity members, and each entity is responsible for managing its bid process and making agreements with vendors.

No Action Required

10. Action to approve the third supplemental interlocal contract for design to increase funding and include a line item for entity design labor and a Conditional Letter of Map Revision/Letter of Map Revision for Flamingo Wash, UPRR to Hotel Rio Drive – Clark County *(For possible action)*

Mr. Parrish stated that Clark County decided to hire a design consultant instead of utilizing in-house resources, as originally planned, due to staff shortages and related factors. Also, he pointed out that a Conditional Letter of Map Revision/Letter of Map Revision line item had been added to the contract. Mr. Parrish informed the Committee that the supplemental fiscal impact would be \$460,000. Mr. Jordano inquired whether the consultant had been selected. Mr. Parrish responded that, to his knowledge, a consultant had not yet been selected.

Staff recommends approval.

Mr. Jordano moved to follow staff recommendation.

6 AYES – 0 NAYS Motion Carried

IV. Discussion Items

11. Discussion and possible action on future Citizens Advisory Committee meeting logistics (*For possible action*)

Mr. Parrish explained that Nevada's pandemic-related Emergency Directives issued by the state's Governor had relaxed the Nevada Revised Statutes Open Meeting Law requirements such that the District could hold virtual Citizens Advisory Committee (CAC) meetings. He informed the CAC that the Emergency Directives had been rescinded, and the Nevada Legislature had passed Assembly Bill 253 (AB253), which authorized the continued staging of virtual meetings for public bodies that were not comprised of elected officials as members. Mr. Parrish set forth that the new law provided an opportunity for the CAC to meet virtually instead of meeting in person but added that virtual meetings presented various logistical challenges. Mr. Starmer inquired about the possibility of a hybrid (in person/virtual) meeting. Mr. Parrish responded that Room 108 was not equipped with the technology to accommodate a hybrid meeting. Mr. Karr stated that he would prefer hybrid meetings, particularly for a shorter meeting, if the option became available. Mr. Jordano shared that he was not in favor of hybrid meetings, having had less than desirable experiences with them. In response, Mr. Parrish mentioned that the District had not found a virtual platform conducive to

conducting a public meeting. Mr. Starmer commented that he liked the personal interactions of in-person meetings. Mr. Desai preferred the flexibility of virtual meetings. Mr. Parrish acknowledged that the virtual meetings had resulted in higher participation rates. Mr. Trelease remarked that in-person meetings tended to offer opportunities for more engagement and interaction among the committee members and staff.

Mr. Newell moved to continue in-person CAC meetings until a time when hybrid meetings become feasible.

6 AYES – 0 NAYS Motion Carried

12. **Comments By the General Public**

There was no response to the call for Comments By the General Public.

Mr. Parrish announced that the District would be holding a press conference to address flash flood safety on July 1, 2021, at the Pittman North Detention Basin in Henderson, Nevada. He added that Chair Mayor Debra March and Vice-Chair Justin Jones were scheduled to speak.

Lastly, Mr. Parrish reminded the Committee that the District would have a photographer present at the next meeting on August 2, 2021, to take each Committee member's photograph for the District's Annual Report.

// // // // //

ADJOURNMENT

The meeting adjourned at 3:38 p.m.

Respectfully submitted,

Steven C. Parrish, P.E. General Manager/Chief Engineer

Attest _____, 2021

Notes:

(1) Construction typically includes Construction and/or Construction Administration. Design typically includes Predesign, Design, Right-of-way, Environmental, and/or Other. (2) Includes amendments to the Ten-Year Construction Program.

(3) Year-2/Year-3 do not include design projects. Design projects are not eligible for acceleration.
(4) Action is being taken in current month on projects in bold/Italics.
(5) Local Drainage projects are not part of the Ten-Year Construction Program.

TOTAL ESTIMATED RESOURCES (Year-1)	\$136,155,084.00
TOTAL REMAINING DESIGN PROJECTS (Year-1)	\$5,436,491.00
TOTAL PROJECTS FUNDED (Year-1)	\$1,559,582.39
CURRENT AVAILABLE CONSTRUCTION RESOURCES (Year-1)	\$129,159,010.61

LOCAL DRAINAGE (5)

Local Drainage Total	\$0.00	\$0.00	\$0.00	
			0.00	
	0.00	0.00	0.00	
	0.00	0.00	0.00	

Notes:

(1) Construction typically includes Construction and/or Construction Administration Design typically includes Predesign, Design, Right-of-way, Environmental, and/or Other.
(2) Includes amendments to the Ten-Year Construction Program
(3) Year-2/Year-3 do not include design projects. Design projects are not eligible for acceleration.
(4) Action is being taken in current month on projects in bold/italics.
(5) Local Drainage projects are not part of the Ten-Year Construction Program.

ESTIMATED FUNDING SCHEDULE

	No Projects Awaiting Funding						

Notes: (1) Estimated CIP resources are from the FY2021-22 Ten-Year Construction Program and may be adjusted for current economic conditions.

CLARK COUNTY REGIONAL FLOOD CONTROL DISTRICT AGENDA ITEM

SUBJECT:

TEN-YEAR CONSTRUCTION PROGRAM AMENDMENTS

PETITIONER:

STEVEN C. PARRISH, P.E., GENERAL MANAGER/CHIEF ENGINEER

RECOMMENDATION OF PETITIONER:

ADOPT AMENDMENTS TO THE TEN-YEAR CONSTRUCTION PROGRAM (FOR POSSIBLE ACTION)

FISCAL IMPACT: None.

BACKGROUND: In accordance with Policies and Procedures Section II.B.9 general amendments can be processed to address scheduling changes and/or the need for additional funding. This agenda item addresses requested changes in funding, positive and negative, associated with this agenda as they impact the Ten-Year Construction Program (TYCP). Amendments to the TYCP are shown for:

Project Description	Project Number	Item No. / Action	Current TYCP Amount	Requested Amendment Amount
Sunset Park – Duck Creek Wash to Eastern Avenue	CLA14X21	Item #09a Original	\$2,239,455.00	\$1,630,000.00
Flamingo, Cimarron Branch – Russell Road to Patrick Lane	CLA01F21	Item #09b Original	\$ 324,574.00	\$ 520,000.00

Steven C. Parrish, P.E. General Manager/Chief Engineer

CLARK COUNTY REGIONAL FLOOD CONTROL DISTRICT AGENDA ITEM

SUBJECT:

AMENDMENT NO. 1 TO THE INTERLOCAL AGREEMENT BETWEEN SOUTHERN NEVADA WATER AUTHORITY AND THE DISTRICT

PETITIONER:

STEVEN C. PARRISH, P.E., GENERAL MANAGER/CHIEF ENGINEER

RECOMMENDATION OF PETITIONER:

APPROVE AND AUTHORIZE THE GENERAL MANAGER TO SIGN AMENDMENT NO. 1 TO THE INTERLOCAL AGREEMENT BETWEEN THE SOUTHERN NEVADA WATER AUTHORITY AND THE DISTRICT TO INCREASE FUNDING TO FUND THE DEVELOPMENT OF SITE-SPECIFIC CRITERIA FOR SELENIUM IN THE LAS VEGAS WASH (FOR POSSIBLE ACTION)

FISCAL IMPACT:

\$100,000 – Original Agreement approved May 21, 2020 <u>\$114,000</u> – First Amendment to the Original Agreement \$214,000 – Total Agreement

**Note: There will be no fiscal impact to the Regional Flood Control District

BACKGROUND:

In May of 2019, the Nevada Division of Environmental Protection (NDEP) published a notice of intent to revise various water quality standards for the Las Vegas Wash. The proposed standards included establishing statewide criteria for selenium based on guidance from the U.S Environmental Protection Agency. Under current conditions, portions of the Las Vegas Wash would be in non-compliance with the proposed statewide selenium criteria. After discussion with various stakeholders in Southern Nevada, NDEP agreed to delay the establishment of a selenium standard for the Las Vegas Wash until December 31, 2023 or until site-specific criteria for the Las Vegas Wash can be developed.

Since 2001, the District Board of Directors has approved an interlocal agreement among the cities of Henderson, Las Vegas, and North Las Vegas; the Clark County Water Reclamation District; the Southern Nevada Water Authority and the District to establish funding allocations and budget each fiscal year for activities in the Las Vegas Wash.

CAC AGENDA	4
ITEM #06	
Date: 08/02/2021	

The draft budget for 2020/2021 included \$100,000 for the development of site-specific criteria for selenium. On May 21, 2020, the District approved an Interlocal Agreement with the Southern Nevada Water Authority to provide for the transfer of \$100,000 to the District to reimburse it for costs to complete the necessary work. In February 2021, the Las Vegas Valley Watershed Advisory Committee recommended an increase of \$114,000 for the project. Amendment No. 1 to the Interlocal Agreement provides for the transfer of an additional \$114,000 to the District to complete the project as budgeted for the 2021-2022 fiscal year. The amendment is attached. The RFCD Attorney has reviewed the agreement.

Respectfully Submitted,

Steven C. Parrish, P.E. General Manager/Chief Engineer

Date: 07/19/2021

AMENDMENT NO. 1 TO THE INTERLOCAL AGREEMENT BETWEEN SOUTHERN NEVADA WATER AUTHORITY AND THE DISTRICT

In May of 2019, the Nevada Division of Environmental Protection (NDEP) published a notice of intent to revise various water quality standards for the Las Vegas Wash. The proposed standards included establishing statewide criteria for selenium based on guidance from the U.S Environmental Protection Agency. Under current conditions, portions of the Las Vegas Wash would be in non-compliance with the proposed statewide selenium criteria. After discussion with various stakeholders in Southern Nevada, NDEP agreed to delay the establishment of a selenium standard for the Las Vegas Wash until December 31, 2023 or until site-specific criteria for the Las Vegas Wash can be developed.

Since 2001, the District Board of Directors has approved an interlocal agreement among the cities of Henderson, Las Vegas, and North Las Vegas; the Clark County Water Reclamation District; the Southern Nevada Water Authority and the District to establish funding allocations and budget each fiscal year for activities in the Las Vegas Wash.

The draft budget for 2020/2021 included \$100,000 for the development of site-specific criteria for selenium. On May 21, 2020, the District approved an Interlocal Agreement with the Southern Nevada Water Authority to provide for the transfer of \$100,000 to the District to reimburse it for costs to complete the necessary work. In February 2021, the Las Vegas Valley Watershed Advisory Committee recommended an increase of \$114,000 for the project. Amendment No. 1 to the Interlocal Agreement provides for the transfer of an additional \$114,000 to the District to complete the project as budgeted for the 2021-2022 fiscal year. The amendment is attached. The RFCD Attorney has reviewed the agreement.

AMENDMENT NO. 1 AGREEMENT REGARDING DEVELOPING SITE-SPECIFIC CRITERIA FOR SELENIUM IN THE LAS VEGAS WASH

THIS AMENDMENT NO. 1 ("Amendment No. 1") to the Agreement Regarding Developing Site-Specific Criteria for Selenium in the Las Vegas Wash ("Agreement"), dated May 21, 2020, is made and entered into this ______ day of ______, 2021, by and between CLARK COUNTY REGIONAL FLOOD CONTROL DISTRICT, a political subdivision of the State of Nevada ("District"), acting by and through its Board of Directors, and the SOUTHERN NEVADA WATER AUTHORITY ("Authority"), a political subdivision of the State of Nevada, acting by and through its Board of Directors. The District and Authority may sometimes be referred to individually as "Party" or collectively as "Parties."

RECITALS

WHEREAS, the Parties are actively involved in the Las Vegas Wash Coordination Committee, a committee comprised of 28 local, state, federal and public representatives, with the intent of stabilizing and enhancing the valuable environmental resources of the Las Vegas Wash ("Wash");

WHEREAS, the Parties were signatories to a July 11, 2002 Cooperative Agreement stating that one objective for the Parties was to cooperate in effectuating the long-term stabilization, enhancement, and management of the Wash;

WHEREAS, the Parties actively participate in the implementation of the Las Vegas Wash Comprehensive Adaptive Management Plan ("LVWCAMP"), a planning document used to meet objectives listed in the July 11, 2002 Cooperative Agreement;

WHEREAS, the Parties are signatories to the 2007 Agreement Regarding the Las Vegas Valley Watershed Advisory Committee ("LVVWAC"), which terminated the July 11, 2002 Cooperative Agreement and created the LVVWAC to continue implementation of the LVWCAMP, along with establishing a cohesive direction and integrated approach to addressing water quality issues in the Las Vegas Valley and Lake Mead;

WHEREAS, the Authority has been designated as the lead agency to implement the LVWCAMP and has established a team to coordinate this effort;

WHEREAS, selenium is a naturally occurring metal that is believed to be discharged to the Wash via the shallow groundwater aquifer;

WHEREAS, the District is willing to take the lead on developing site-specific criteria for selenium in the Wash, provided the LVVWAC members pay a share of the costs through contributions to the Authority in a separate Agreement;

WHEREAS, upon receipt of sufficient funds provided through this Agreement the District will hire a consultant to perform Phase I of a study to determine site-specific criteria for selenium for the Wash and establish an approach to address selenium in the tributaries to the Wash;

WHEREAS, the Parties are members of the Las Vegas Valley Watershed Advisory Committee ("LVVWAC"), which created a more unified and integrated approach to addressing water quality issues in the Las Vegas Valley and Lake Mead, including the Las Vegas Wash ("Wash") and established the Las Vegas Wash Comprehensive Adaptive Management Plan;

WHEREAS, the Authority has been designated as the lead agency to implement the Las Vegas Wash Comprehensive Adaptive Management Plan and has established a team that coordinates this effort;

WHEREAS, the State of Nevada established statewide water quality criteria for selenium and has delayed implementation of that criteria for the Wash for three years to give the local jurisdictions time to develop site-specific criteria for selenium in the Wash;

WHEREAS, on May 21, 2020, the Board approved the Agreement between the Authority and the District, which authorized the District to lead the development of site-specific criteria for selenium in the Wash in furtherance of LVVWAC members' benefit and authorizes the Authority to pay the District up to \$100,000 for developing site-specific criteria with funding made available through contributions established and agreed to by LVVWAC members; and

WHEREAS, due to unforeseen circumstances, the District needs additional funding to complete its selenium study and the LVVWAC members have determined that contributing the additional funding is necessary and can be accomplished within LVVWAC's budget.

NOW, THEREFORE, in consideration of the mutual covenants herein contained, the sufficiency of which is hereby acknowledged, the Parties agree to amend the Agreement as identified in this Amendment No. 1 as follows:

Section 4. Project Funding, shall be changed to read as follows:

Cost of services under this Agreement will not exceed \$214,000.

Compliance with Agreement

This Amendment No. 1 complies with Section 5.1 of the Agreement, which states in relevant part: "The Parties agree that representatives of the Parties may make changes, as appropriate or required, to accomplish Project objectives; provided, however, that such changes do not result in an increase in the financial obligation of either Party, unless otherwise extended by written agreement of the Parties."

The remainder of the original agreement dated May 21, 2020 shall remain unchanged.

IN WITNESS WHEREOF, each of the Parties has executed this Amendment No. 1 to the Interlocal Agreement as of the date and year first written above.

CLARK COUNTY REGIONAL FLOOD CONTROL DISTRICT AGENDA ITEM

SUBJECT: HYDROLOGIC CRITERIA AND DRAINAGE DESIGN MANUAL UPDATE

PETITIONER:

STEVEN C. PARRISH, P.E., GENERAL MANAGER/CHIEF ENGINEER

RECOMMENDATION OF PETITIONER:

APPROVE AND AUTHORIZE THE CHAIR TO SIGN THE SECOND AMENDMENT TO THE CONSULTANT CONTRACT WITH ATKINS NORTH AMERICA, INC., TO INCREASE FUNDING AND EXTEND THE COMPLETION DATE TO PREPARE AN UPDATE TO THE HYDROLOGIC CRITERIA AND DRAINAGE DESIGN MANUAL (FOR POSSIBLE ACTION)

FISCAL IMPACT: \$600,000 – Original Contract \$0 – First Amendment – date extension only <u>\$375.000</u> – Second Amendment \$975,000 – Total

BACKGROUND:

On August 8, 2019, the District entered into a professional services contract with Atkins North America, Inc., to prepare an update to the Hydrologic Criteria and Drainage Design Manual. On April 8, 2021, the contract was extended by the Board of Directors to June 30, 2022.

The scope negotiated in the original contract provided general estimates of effort in technical revisions until preliminary research and stakeholder outreach was completed. Additional funds are needed to complete the project based on the revised scope. An extension of time is also needed to complete the project and provide necessary training. Staff recommends extending the consultant contract from June 30, 2022 to June 30, 2023.

The revised contract has been reviewed by the RFCD Attorney.

Respectfully submitted,

Steven C. Parrish, P.E. General Manager/Chief Engineer

Recommendation:

072921 HCDDM Update-Amendment 2-aid

SECOND AMENDMENT TO THE AGREEMENT FOR PROFESSIONAL SERVICES CLARK COUNTY REGIONAL FLOOD CONTROL DISTRICT AND ATKINS NORTH AMERICA, INC.

TO COMPLETE AN UPDATE TO THE HYDROLOGIC CRITERIA AND DRAINAGE DESIGN MANUAL

THIS SECOND AMENDMENT TO THE AGREEMENT is made and entered into this 12th day of August, 2021, by and between the CLARK COUNTY REGIONAL FLOOD CONTROL DISTRICT (hereinafter referred to as "DISTRICT") and Atkins North America Inc., a Florida Corporation authorized to do business here in Clark County (hereinafter referred to as "CONSULTANT"), for an Update to the Hydrologic Criteria and Drainage Design Manual (hereinafter referred to as the "PROJECT").

WITNESSETH

WHEREAS, the DISTRICT desires to complete an update to the Hydrologic Criteria and Drainage Design Manual (MANUAL).

WHEREAS, the CONSULTANT is experienced and is knowledgeable in the completion of such works; and

WHEREAS, the CONSULTANT represents that it is properly registered and qualified in accordance with the Nevada Revised Statutes and has the personnel and facilities necessary to accomplish the PROJECT within the required time;

WHEREAS, based on preliminary research and stakeholder outreach additional work, funds and time are needed to complete the Project;

WHEREAS, a professional services AGREEMENT was entered into between the DISTRICT and CONSULTANT on August 8, 2019 and supplemented on April 8, 2021; and

WHEREAS, the parties desire to set forth the responsibilities, terms, and conditions of completing the PROJECT.

NOW, THEREFORE, in consideration of the premises and terms contained herein, the parties agree as follows:

Section III

CONSULTANT SERVICES, paragraph A, shall be revised to read as follows:

A. The CONSULTANT shall perform Task 1 through Task 5 including services discussed in the "Basic Services" as specified in the Revised Exhibit A (the Revised Scope of Services), which is attached hereto, and by this reference made a part of this AGREEMENT. In addition, the CONSULTANT will perform Task 6, "Supplemental Services" described in the Revised Exhibit A if, as, and when requested in writing by the General Manager. The Revised Exhibit C, the Project Time Schedule, is attached hereto and by this reference made a part of this AGREEMENT.

Section IV

COMPENSATION AND TERMS OF PAYMENT, paragraphs B.2, B.3 and B.4 shall be revised to read as follows:

- B. Compensation and Method of Payment for Engineering Services are:
 - 2. The <u>maximum cost</u> to the DISTRICT for Basic Services Task 1 through Task 5 including services discussed in Project Description accomplished under this AGREEMENT shall not exceed nine hundred ten thousand eight hundred thirteen dollars and zero cents (\$910,813.00) unless the DISTRICT receives a written request, with justification, and the DISTRICT approves a change in the SCOPE OF SERVICES and an increase in compensation. If approved, a supplement to this AGREEMENT must be executed. The maximum cost is

based on a detailed breakdown of the estimated cost by tasks, and direct costs is shown on the Revised Exhibit E – Estimated Cost By Tasks, which is attached hereto, and by this reference made a part of this AGREEMENT. The estimated cost figures, per task, presented in the Revised Exhibit E may, with the written approval from the DISTRICT, be adjusted from task to task so long as the total amount does not exceed nine hundred ten thousand eight hundred thirteen dollars and zero cents (\$910,813.00). Payments will be made to the CONSULTANT on a monthly basis upon receipt of a progress report and itemized invoices for work accomplished.

- 3. Supplemental services (Task 6) will be performed only upon written authorization by the General Manager and at the discretion of the General Manager. Payment for Supplemental Services will be made according to the terms described in this section for basic professional services. The <u>maximum</u> <u>cost</u> to the DISTRICT for supplemental services accomplished under this AGREEMENT shall not exceed sixty-four thousand one hundred eighty-seven dollars and zero cents (\$64,187.00). Payments will be made to the CONSULTANT on a monthly basis upon receipt of a progress report and itemized invoices for work accomplished.
- 4. The total amount of this AGREEMENT shall not exceed nine hundred seventyfive thousand dollars and zero cents (\$975,000.00), unless approved by the DISTRICT in writing and a supplement to this AGREEMENT is executed by the parties.

Section V

TIME AND PERFORMANCE, paragraph E shall be revised to read as follows:

E. This AGREEMENT shall begin on August 8, 2019 and terminate on June 30, 2023 unless it is extended before the termination date with the mutual written consent of both parties or earlier terminated pursuant to Section VI.

The remainder of the original AGREEMENT and First Amendment to the AGREEMENT shall remain unchanged.

IN WITNESS WHEREOF, the parties have caused this SECOND AMENDMENT TO THE AGREEMENT to be executed the day and year first above written.

Christopher Figgins **RFCD** Attorney

072921 HCDDM Update-Amendment 2-contract

REVISED EXHIBIT A SCOPE OF SERVICES UPDATE OF THE HYDROLOGIC CRITERIA AND DRAINAGE DESIGN MANUAL

PROJECT DESCRIPTION

The project includes a review and update of the Hydrologic Criteria and Drainage Design Manual (HCDDM). The HCDDM shall be revised to correct errors and discrepancies, incorporate feedback from stakeholders, include updated text, criteria, formulas, equations, charts, and/or diagrams based on updated reference material, and improve the clarity and usability of the HCDDM. A working group will be formed consisting of representatives of the member entities and other stakeholders as appropriate. The working group will be facilitated by Atkins (ATKINS or CONSULTANT) in cooperation with the Clark County Regional Flood Control District (DISTRICT).

TASK 1. PROJECT MANAGEMENT AND COORDINATION

1.1 Build Stakeholder Working Group and Communication Framework

ATKINS will assist the DISTRICT in forming a working group consisting of representatives of the District, the public works staffs of the member entities and other stakeholders as appropriate. A technical subcommittee will also be formed consisting of other subject matter experts as appropriate. A communication framework will be designed by ATKINS using Microsoft Sharepoint (or similar platform) to facilitate the sharing of files between Atkins, the DISTRICT, and other key stakeholders.

1.2 Project Management and Communication

ATKINS will perform project management tasks such as internal coordination and meetings, planning, scheduling the work and resources, project control plan, quality control plan, task breakdown and budget reviews, and invoicing. A project schedule will also be prepared and maintained throughout the project. Project coordination via email, phone calls, conference calls, and Sharepoint will also be carried out.

1.3 Meetings

ATKINS will prepare agendas, coordinate, schedule, and conduct in-person monthly meetings to systematically and thoroughly discuss and review each portion of the HCDDM. Meeting minutes will be prepared to document the outcome of each meeting and resulting action steps. Working group meetings are anticipated to be held bi-monthly, with progress meetings occurring during the "off" months. A 16-month project schedule is anticipated. Additional individual or recurring meetings will be held as needed. ATKINS role in providing agendas and/or meeting minutes will be determined prior to the start of these meetings.

TASK 2. DATA COLLECTION

2.1 Literature Review of Other Manuals

ATKINS will perform a literature review of similar drainage design manuals prepared by other agencies focusing in the western United States. A summary of recent updates, additions, and best practices that pertain to each section of the HCDDM will be documented. Any recommendations for new content will be described in a brief memo and presented to the DISTRICT for further discussion and consideration.

Deliverable: Summary spreadsheet listing manuals reviewed and describing relevant content that could be implemented in Clark County.

2.2 Gather and Compile Known Issues

ATKINS will coordinate with the DISTRICT, member entities, the working group, the technical subcommittee, and other stakeholders to request, obtain, and compile a comprehensive list of known issues related to the current HCDDM. Issues will be organized on the Sharepoint site according to sections in the HCDDM and condensed to remove duplicate issues.

2.3 Solicit Additional Stakeholder Input

ATKINS will prepare an online feedback portal (Bluebeam, Adobe Cloud, or similar application) to solicit additional stakeholder input on the current HCDDM. The portal will include a PDF version of the HCDDM that can be electronically marked up or redlined if needed. The portal will allow multiple users to make comments or add redlines to the same version of the PDF file. ATKINS will coordinate with local professional organizations to post a link to the feedback portal in organizational emails, on websites, and within social media feeds.

2.4 Technical Review of Current HCDDM

ATKINS will perform a technical review of the current HCDDM to better identify specific HCDDM updates to be performed. Textbooks, guidance documents, handbooks, engineering papers, manuals, and other pertinent information will be researched to review equations, figures, maps, guidelines, diagrams, references or other information contained in the HCDDM. Technical reviewers may include ATKINS' staff, other subject matter experts on the CONSULTANT team, key working group members, and/or technical subcommittee members.

Deliverable: Summary memorandum describing/outlining specific HCDDM updates to be performed within each section of the HCDDM.

TASK 3. TECHNICAL REVISIONS

3.1 Prepare Technical Revisions

ATKINS will prepare technical revisions of the HCDDM as described in the subtasks below. Technical revisions will be provided for review by the DISTRICT, the working group, and other relevant stakeholders. DISTRICT staff will make final determinations on HCDDM content in cases where consensus cannot be reached.

Deliverables: Technical revisions presented in electronic format (PPT, PDF, or similar).

3.1.0 Overall Review

A review of equations, tables, references, grammar, etc., and the overall organization will be carried out to identify errors, omissions, or necessary changes to be incorporated in the updated HCDDM.

3.1.1 Section 100 - General Provisions

The following updates will be made to Section 100:

- <u>Abbreviations</u>: Abbreviations will be reviewed and updated. Obsolete or unused abbreviations and/or acronyms will be removed.
- <u>Glossary References</u>: Glossary references will be updated to refer to the "most current adopted edition and all future amendments" of various referenced standards in lieu of including a specific publication date or version number.
- <u>Provisions</u>: A provision will be added to Section 100 stating that the HCDDM standards are based on the best available data at the time this document was developed. The design engineer must utilize best practices at the time of the project and not rely on these standards due to the ever-evolving industry standards.
- <u>Variance Procedures</u>: The process of obtaining variances for local flood control facilities will be clarified to confirm whether RFCD approval is also needed.
- 3.1.2 Section 200 Drainage Planning and Submittal

The following updates will be made to Section 200:

- <u>CCRFCD</u> Concurrence: Table 201 will be expanded to reflect submittal requirements for CCRFCD Concurrence. A requirement that structural plans, details, and calculations shall be approved by the entity prior to submittal to CCRFCD for concurrence of the drainage study will be added to Section 201.
- <u>Construction Permits</u>: NDEP requirements for minimum area of disturbance (1 mi. v. 5 mi.) requiring construction permits will be reviewed for possible updates to Section 207.1. A link to NDEP requirements will also be provided as a reference.
- <u>Grading Plan/Drainage Plan</u>: The difference between a drainage plan, grading plan, and figures will be clarified in Section 200. Grading plan requirements will be added.
- <u>Report Outline</u>: Additional sections and explanation will be added to the Hydrology and Hydraulics Addendum outline presented in Section 205. These include: Technical Drainage Study Addendum, Technical Drainage Study Supplement, Technical Drainage Study Update, and Technical Drainage Study Concurrence from Impacted Neighboring Entities.

- <u>Standard Form 1</u>: The statement that Standard Form 1 may have sufficient information to serve as a conceptual drainage study will be removed.
- <u>Standard Form 2</u>: Several updates to Standard Form 2 will be implemented. These consist of the following:
 - A requirement to submit grading plans/improvement plans will be added.
 - Formatting will be updated, and notes added, to further clarify that the form is not required to be submitted (only to be used as a guide for engineers).
 - A requirement to provide the watershed map from the MPU will be added.
 - The required number of copies of Drainage Plans will be updated.
 - Additional labeling requirements for retaining walls will be added.
 - A requirement to provide a BMP figure showing impervious areas, treated and non-treated areas, and on-site BMPs will be added.
- <u>Submittal File Format</u>: The requirements for microfilm, mylar, hard copy, and digital submittals will be reviewed and updated as needed. An allowance for digital (PDF) copies will be added.
- <u>Submittal Nomenclature</u>: Nomenclature used to describe existing, interim, developed, and ultimate conditions will be reviewed and updated for clarity. Specifically, the term "developed" will be further defined to specify whether it refers to the site or the upstream watershed. The term "Master Drainage Study" will be reviewed and potentially revised to read "Master/Conceptual Drainage Study".

The following topics will be investigated with the stakeholder group and researched as necessary to determine whether to implement proposed changes and to what extent:

- <u>Technical Drainage Study</u>: Technical Drainage Study guidance will be reviewed to determine whether a TDS is needed for project sites less than 1 acre in size. Recommendations for how to treat project sites less than 1 acre in size will be provided.
- 3.1.3 Section 300 Drainage Policy

The following updates will be made to Section 300:

- <u>Bubbler Systems</u>: Required approval for bubbler systems will be reviewed and updated as needed. Relevant changes to Section 304.4 will be coordinated with changes described in the scope for Section 900.
- <u>Culvert Design Standards</u>: Culvert design standards will be revised to follow bridge criteria (2-ft above 100-yr water level to the low chord) for certain design flowrates (500 cfs and greater). Exceptions for NDOT facilities will be incorporated into the design criteria.
- <u>Culverts and Bridges</u>: Criteria for culverts and bridges contained in Section 304.5 will be moved to Section 1000.

- <u>Master Plan Amendments/Master Plan Changes</u>: Criteria will be added regarding master plan amendments and master plan changes, as well as references to relevant sections in the Nevada Revised Statute, to include information not already contained in the CCRFCD Policies and Procedures Manual.
- <u>Multi-Use Facilities</u>: The multi-use facility signage paragraph in the Drainage Law section will be reviewed and potentially moved to Section 304.8.
- <u>Typical Lot Drainage</u>: Typical Lot Drainage figure will be updated for consistency with Building Code standards and to include other typical lot types.
- <u>Vertical Control</u>: The vertical control section will be updated to add current datum information and remove outdated information. A discussion of considerations for the anticipated USGS 2022 datum update will also be included.

The following topics will be investigated with the stakeholder group and researched as necessary to determine whether to implement proposed changes and to what extent:

- <u>Easements</u>: Easement criteria for additional easement scenarios will be considered for possible inclusion in the HCDDM. Easement guidance from various entities will be reviewed for possible consolidation into more general easement requirements.
- <u>FEMA Guidance</u>: Requirements contained in Standard Form 2 for completing a water surface profile analysis will be reviewed to determine whether exceptions should be granted for small developments in which the engineer is not altering the base flood elevation. Guidance relative to CLOMR/LOMR submittals will be reviewed for accuracy and include direct references to the FEMA website where appropriate. Criteria regarding allowable construction activities and building permit/certificate of occupancy issuance based on CLOMR/LOMR status will be reviewed for possible County-wide adoption.
- <u>Maintenance of Private Easements</u>: The requirement to submit maintenance procedures for private easements with drainage studies will be reviewed for possible clarification or removal.
- <u>Nuisance Flow</u>: Acceptable mitigation measures for nuisance flow will be reviewed for possible inclusion in the HCDDM. Should a minimum spacing for nuisance inlets be adopted in Section 800, this standard will be referenced in Section 303.1.3.
- 3.1.4 Section 400 Drainage Law

Updates in Section 400 to be included in sub-tasks 3.1.0 and 3.1.18.

3.1.5 Section 500 - Rainfall:

The following updates will be made to Section 500:

 DARF: The method for applying DARF values will be reviewed and clarified in the HCDDM to ensure consistent application of Table 502. DARF research and recommendations prepared by NDOT will be reviewed, incorporated, and referenced where applicable. The example in 507.2 will be updated to show the correct use of DARFs.

- Figure Updates: The accuracy and relevancy of Figures 518 (Hypothetical Basin for Non-Urban, Large Basin Examples), 519 (Hypothetical Basin for Urban, Small Basin Examples) and 520 (Precipitation Depth Versus Return Period for Example in Section 507.3) will be reviewed and either updated or removed if not needed.
- Rainfall: Rainfall depths will be updated to incorporate the 1.43 adjustment factor into the rainfall values currently published in the HCDDM (applying a manual 1.43 adjustment will no longer be needed). Revised isopluvial maps will be generated to reflect the updated depths. An explanation of the updated rainfall criteria will also be added (e.g. review of Clark County gauges, comparison with NOAA 14).
- Software: References to HEC-1 will be updated to also allow HEC-HMS.
- Temporal Distribution: The source for the SDN 6-hour rainfall temporal distributions will be researched and added to the HCDDM.

The following topics will be investigated with the stakeholder group and researched as necessary to determine whether to implement proposed changes and to what extent. Implementation for these items is not part of the scope:

- Climate Change/Extreme Events: Rainfall depths for the 500-yr and 1000-yr events will be researched for possible inclusion in Section 500 to facilitate extreme event analysis per comments from the Division of Dam Safety.
- 3.1.6 Section 600 Storm Runoff

The following updates will be made to Section 600:

- <u>Curve Number/Impervious Percent</u>: The curve number methodology presented in the HCDDM will be reviewed and updated to follow the 2018 Las Vegas Valley MPU, which will be modified to include additional land use categories that are more appropriate for detailed drainage studies. Impervious percent will also be reviewed and updated to better represent current development trends in Clark County and to achieve consistency between various tables and methods.
- <u>Green and Ampt</u>: The Green and Ampt loss method will be added to the HCDDM as being acceptable for use within the City of Mesquite and Town of Bunkerville. The methodology will be based on the method described in the Mohave County Drainage Design Manual. Relevant parameters will be reviewed in the Mohave County Manual and added to the HCDDM where appropriate.
- <u>Hydrologic Routing</u>: Routing methods will be evaluated to determine the applicability of various routing methods (e.g. Kinematic Wave, Muskingum, Muskingum Cunge, Modified Puls). Specific recommendations of when to use each method, if applicable, will be added to the HCDDM.

- <u>Statistical Analysis</u>: Statistical analysis guidelines will be updated to follow Guidelines for Determining Flood Flow Frequency, Bulletin 17C published by the USGS in May 2019.
- <u>Storm Centering</u>: A discussion of storm centering and its use in the design and evaluation of detention basins will be added to the HCDDM. Guidance will follow the approach described in the 2018 LVV MPU.

The following topics will be investigated with the stakeholder group and researched as necessary to determine whether to implement proposed changes and to what extent. Implementation for these items is not part of the scope:

- <u>Soils</u>: Soils data from NRCS will be published in tabular format in the appendix of Section 600. Missing soil groups will be assigned based on the approach used in the Las Vegas Valley MPU. Possible enhancements to the presentation and accessibility of soils data (e.g. for download or viewing through FloodView Advanced) will be addressed in a future task order.
- <u>HEC-HMS</u>: The possibility of allowing HEC-HMS will be explored. This includes providing applicable guidance on necessary adaptations, if any, for Clark County methods. The need for supporting files to make this transition easier will also be identified and could include a HEC-HMS template file, supporting spreadsheets to ensure consistency in model inputs, or a customized HEC-HMS stylesheet that creates a custom report with pertinent model information for reviews.
- <u>Kinematic Wave Transform</u>: The possibility of removing specific references to the Kinematic Wave transform method will be explored. The differences between this method and the SCS unit hydrograph transform will be investigated.
- <u>Rational Method</u>: Rational Method runoff coefficients (C) will be updated based on current literature. Based on the updated runoff coefficients, rational method results will also be reviewed to determine whether the 0.5 adjustment factor (K) is still appropriate.
- <u>Time of Concentration</u>: A sensitivity analysis of velocity coefficients will be carried out to determine whether additional velocity guidance is needed. A possible locked/validated Excel spreadsheet will be supplied to the District as an option to replace Standard Form 4.
- <u>TR-55</u>: The possibility of removing references to TR-55 will be explored as it is no longer supported and has been completely rewritten and replaced by WinTR-55. The capabilities of WinTR-55 will be examined to determine whether inclusion in the HCDDM is appropriate.

3.1.7 Section 700 – Open Channel

The following updates will be made to Section 700:

 <u>Access Ramps</u>: Access ramp requirements will be revised with new minimum dimensions for ramp and opening widths.

- <u>Supercritical Flow Transitions</u>: Subsection 706.2.1.1 and Figures 708 and 709 provide discussion on supercritical flow transitions. Example calculation will be updated for clarity in the HCDDM. The method for computing supercritical flow transitions is not proposed to be changed, just clarification added to existing criteria.
- <u>Manning's Roughness</u>: Table 702 will be expanded to include roughness values for additional channel linings. Existing roughness values, particularly those provided for cemented rubble (grouted riprap), will be reviewed and updated.
- <u>Outlet Protection</u>: An example illustrating the proper sizing of rip-rap outlet protection with respect to Froude number constraints will be added.
- <u>Uniform Critical Flow Analysis</u>: Clarification will be added to the HCDDM to define what is meant by "unstable conditions" for transitional flow (0.86 < Fr < 1.13) and why it is undesirable.

The following topics will be coordinated with District and subject matter expert(s) prior to making changes to the Manual These topics also include implementation as part of the scope:

District and Subject Matter Expert Coordination

- <u>Cutoff Walls</u>: Additional clarification and explanation will be added to the HCDDM to address joint considerations for cutoff walls and the preferred method for connecting cutoff walls to channels.
- <u>Structural Joints</u>: A 3-inch starter wall, rather than a joint at the base of a channel wall, will be added as a requirement in the HCDDM. Guidance for placement of longitudinal joints in wide channels will also be added.
- <u>Structural Channel Thickness</u>: Maintenance equipment weight will be researched for impacts to channel invert section thicknesses.
- <u>Structural Concrete Mix Designs</u>: Concrete mix designs will be reviewed based on the observations made by subject matter experts, research into other agency design guidelines, and District preferences. Recommendations for updated concrete mix design criteria will be provided.
- <u>Structural Reinforcement</u>: A possible area of steel requirement will be explored with respect to using high strength reinforcement for panel and continuous reinforcement options.

District Coordination

- <u>Multi-Use Channels</u>: After review of Section 304.8, a new sub-section will be considered for Section 700 to address multi-use facilities and minimum safety requirements (e.g. fencing).
- <u>Soil Cement</u>: Soil Cement criteria with respect to code requirements, proportioning, testing and plating method will be updated per recommendations from the California Nevada Cement Association.
- <u>Structural Vehicular Access</u>: Updated requirements from the Department of Environment and Sustainability (DES), formerly known as Department of Air Quality, will be reviewed to determine their impact, if any, on acceptable

materials for access roads. HCDDM criteria for vehicular access will be updated accordingly to define a minimum surface treatment standard.

 <u>Vegetation Lining</u>: The SNWA water smart program plant list will be added as a reference for acceptable vegetative channel linings.

The following topics will be investigated with the stakeholder group and researched as necessary to determine whether to implement proposed changes and to what extent. Implementation for these items is not part of the listed scope:

- <u>Clogging Factors</u>: Maintenance issues associated with chain link fences crossing tributary drainage paths will be investigated. If drainage paths are frequently crossed by fences, requirements for appropriate clogging factors will be included.
- <u>Concrete Arch Culverts</u>: A concrete arch culvert specification that includes a minimum reinforcement spacing to avoid cracking will be researched for possible inclusion in the HCDDM.
- <u>Confluences</u>: The USACE's Hydraulic Design of Flood Control Channels (EM-1110-2-1601) is referenced in Subsection 706 for channel confluences. Additional guidelines used by other agencies will be researched for possible inclusion in the HCDDM.
- <u>Debris Bulking</u>: Guidance on pier bulking will be researched for possible inclusion in the HCDDM. Possible standards may include 1-ft wider each side or double pier width (Maricopa County) or basing the bulking factor on flow conditions and upstream debris supply.
- <u>Maximum Velocities</u>: Maximum allowable velocities shown for earthen channels, gabion-lined channels, concrete channels and other linings will be reviewed to determine appropriate limits. Other channel linings (e.g. articulated concrete block, turf reinforcement) will be reviewed for possible inclusion in Tables 702 and 703. Guidance may be added for sacrificial concrete, larger aggregate, or other durability measures when velocities exceed a certain threshold.
- Measures when velocities exceed a certain threshold.
- 3.1.8 Section 800 Storm Sewer Systems:

The following updates will be made to Section 800:

- <u>Drop Manholes</u>: Criteria for drop manholes will be added to the HCDDM, similar to DCSWCS 2.3.15.D
- Joint Sealants: Guidance for storm drain joints will be reviewed and updated to require rubber gaskets only. A reference to the new NDEP requirement to provide watertight joints on drop inlets for waterline separation <10-ft will be added to the HCDDM.
- <u>Manholes</u>: The reference to Clark County "Improvement Standards" for manhole standard drawings will be reviewed and updated to use the correct reference. The possibility of adding a requirement for a minimum 0.2-ft drop at

manholes will be explored. Manhole spacing requirements will be updated to reflect different criteria for RCB/RCA (manholes not needed at junctions).

- <u>Manning's Roughness</u>: Guidance regarding the applicability of Manning's n for RCP vs. RCB and pre-cast vs. cast-in-place concrete, as well as recommended values for C-900 will be added to Section 802.3.
- <u>Material and Shape</u>: References to RCA, water quality pipe, HDPE, cast-in-place concrete pipe, and other common materials will be added to the HCDDM. There will also be wording to suggest that other materials/shapes will be considered on a case-by-case basis.
- <u>Minimum Cover</u>: The minimum cover depth will be reviewed and additional guidance will be included in the HCDDM about where this should be measured from and how this is impacted by pipe material.
- <u>Pipe/RCB Installation</u>: General guidance regarding Pipe/RCB bedding, trench sections, geotechnical study considerations, pre-cast vs. cast-in-place boxes will be added to Section 803. Standard specifications will continue to be referenced.
- <u>Sump Overflow</u>: Additional criteria will be added for drop inlets in sump to perform emergency overflow analysis during a full clogging scenario.
- <u>Utility Clearances</u>: Clearance requirements will be reviewed for consistency with standards from other utilities and updated as needed. References to UDACS, DCSWCS, etc. will be added.

The following topics will be coordinated with District and subject matter expert(s) prior to making changes to the Manual These topics also include implementation as part of the scope:

- <u>Confluence Angle</u>: A recent UNLV study on ideal confluence angles for storm sewers will be reviewed and incorporated into the HCDDM. This subtask assumes that the UNLV study is complete and includes clear recommendations that CCRFCD has reviewed and approved for incorporation into the HCDDM.
- <u>Losses</u>: UNLV research on head loss at junctions will be reviewed to determine whether minor head loss equations should be updated. Loss equations will also be reviewed for consistency with commonly used software.

The following topics will be coordinated with District and possibly stakeholders prior to making changes to the Manual These topics also include implementation as part of the scope:

 <u>Software</u>: Specific guidance on the applicability of commonly used storm drain software will be included in the HCDDM with a disclaimer that engineers are ultimately responsible for ensuring that software is applied so that it meets District criteria. Software to be considered in the guidance includes WSPG, StormCAD, Hydraflow, SSA, and SWMM. A distinction will be drawn between culverts and storm drains with guidance for when culvert analysis is more appropriate than a storm drain analysis.

- <u>Standard Form 6</u>: Standard Form 6 will be updated to be more user/reviewer friendly. A downloadable Excel template will be prepared, and the Standard Form 6 example problem will be updated for clarity.
- <u>Drop Inlet Max Sizing/Min Spacing</u>: Guidance for maximum drop inlet sizes and minimum drop inlet spacing (for drop inlets in series) will be standardized and added to the HCDDM. Standard spacing for nuisance inlets will also be reviewed for possible standardization across the valley.
- <u>Cavitation</u>: Cavitation guidance will be reviewed for possible inclusion in the HCDDM with a recommendation of when cavitation analysis should be performed.
- <u>Charts and Tables</u>: Additional charts and tables that may be beneficial to Section 800 will be investigated and recommended for inclusion in the HCDDM.
- <u>Drop Inlet Calculations/Clogging Factors</u>: Drop inlet analysis methods and clogging factors will be reviewed and a standardized method will be recommended. Outdated methods that are no longer used or recommended (e.g. drop inlet curves) will be removed from the HCDDM.
- Local Entity Criteria: Local entity criteria relative to Section 800 will be reviewed for possible standardization within overall regional criteria. These include a request by City of North Las Vegas to allow HDPE pipes under certain conditions and a request by the City of Las Vegas to add minimum height criteria for arch culverts and associated stem walls.
- <u>Slope</u>: The minimum slope requirement will be reviewed to determine whether a steeper slope (0.4%) is more appropriate.
- <u>Structural Details</u>: The possibility of adding a standard pipe penetration detail will be explored. This may be added to the District's website in lieu of the HCDDM.
- <u>Velocities</u>: The minimum velocity requirement will be evaluated to determine if the assumption of 3 fps is enough to promote debris transportation in larger pipes. A tractive tension analysis will be explored as an alternative to minimum velocity criteria. The maximum velocity requirement will be reviewed to determine whether mitigation strategies including sacrificial concrete and/or concrete strength requirements should be added to the HCDDM.
- 3.1.9 Section 900 Streets

The following updates will be made to Section 900:

- <u>Street Freeboard</u>: Standard criteria relative to the required "hump" height to provide flood protection for non-elevated driveways as described in Standard Form 2 will be added to Section 900 of the HCDDM.
- <u>Transverse Flow Depth</u>: The maximum allowable depth for transverse flow (1 ft vs. 2 ft) will be updated for consistency between Sections 300 & 1000 in the HCDDM.

The following topics will be investigated with the stakeholder group and researched as necessary to determine whether to implement proposed changes and to what extent. Implementation for these items may be included in this scope depending on direction from District and stakeholder group:

- <u>Bubbler System</u>: Bubbler systems are allowed by certain entities under specific circumstances, though generally prohibited by CCRFCD. The possibility of prescribing uniform bubbler system and associated bleeder line criteria will be explored.
- <u>Finished Flood Elevations</u>: Finished floor criteria will be reviewed to determine what exceptions, if any, should be made for garages, storage units, or for townhomes/apartments/attached units with short driveways where adjacent flows are minimal. Differing requirements for FFEs near SFHAs and drainage easements will also be reviewed for possible consolidation. The possibility of consolidating all finished floor guidance into one section will also be evaluated.
- <u>Flow Splits</u>: The possibility of providing standardized flow split criteria will be explored. References from Pima County and others will be reviewed for possible adoption or adaptation. A step by step procedure and/or sample problem will also be considered.
- <u>Hinged Manhole Lids</u>: Criteria regarding the appropriate use, placement, and orientation of hinged manhole lids will be reviewed for possible inclusion in the HCDDM.
- <u>Minimum Street Slope</u>: The minimum required longitudinal street slope of 0.4% will be reviewed to determine whether a distinction should be made between centerline slope and gutter slope and/or if the minimum requirement should be raised, particularly for residential streets.
- <u>Residential Streets</u>: The allowable flow depth in residential streets will be reviewed to determine whether depth should be contained in right-of-way or limited to top of curb and whether storm drain should be required when depths exceed the top of curb. The possibility of standardizing these criteria for the entire County will also be explored.
- <u>Rural Streets</u>: The possibility of granting exceptions to dry-lane criteria for rural roads will be explored.
- <u>Street Capacity</u>: Street capacity requirements will be reviewed to determine whether minor street capacity calculations should include the center turn lane. The possibility of removing the curb height flowline exception to street capacity criteria will also be explored.
- <u>Street Functional Class</u>: The possibility of specifying dry lane requirements according to the functional street class (e.g. Arterial, Major Collector, etc.) rather than ROW width will be explored.
- <u>T-Intersections</u>: Additional requirements for drainage design at T-intersections will be researched. Recommendations for new criteria will be made and could include consideration of the velocity head, energy grade line, erosion protection, energy dissipation, or other requirements.

- Wall Openings: CCPW requires a 50% clogging factor when designing block wall openings. They are requesting a minimum size to be specified (16-in x 48-in). These criteria will be reviewed for possible adoption as regional requirements in the HCDDM.
- 3.1.10 Section 1000 Culverts and Bridges
 - The following updates will be made to Section 1000:
 - <u>Culvert Design Standards</u>: Updates to culvert design standards implemented in Section 300 will be incorporated into Section 1000. Culvert design criteria from both sections will be consolidated. Criteria that states that culverts along regional alignments that cross roadways should be treated as bridges will be copied to the culvert design section.
 - <u>Headwater Criteria</u>: Headwater criteria in Section 1002.4 will be reviewed and updated to be consistent with overtopping guidance in Section 1002.1.2 and Section 304.5. This task does not include time to develop new headwater criteria, just to add clarification for how it is applied and to be consistent between the three sections. Atkins will follow up on an additional comment on headwater criteria to get clarification.
 - <u>Manning's Roughness</u>: Manning's roughness values presented in Table 1001 will be reviewed and updated to be consistent with Manning's roughness values in other sections. Criteria for sensitivity analyses will also be considered.
 - <u>Pier Bulking</u>: Pier bulking will be researched, and standard criteria added to the HCDDM update.

The following topics will be investigated with the stakeholder group and researched as necessary to determine whether to implement proposed changes and to what extent. Implementation for these items may be included in this scope depending on direction from District and stakeholder group:

- <u>Nomographs</u>: The availability of nomographs for n-values of 0.013 and 0.015 will be researched for potential inclusion in the HCDDM. Nomographs for lateral calculations will be replaced.
- <u>Riprap</u>: Riprap erosion design at culvert crossings that allows safe passage of desert tortoise will be reviewed and considered for possible inclusion in Section 1000.
- <u>Software</u>: Culvert modeling guidance for commonly used culvert modeling software will be researched to determine whether it should be added to the HCDDM. Software to be researched includes HY-8, HEC-RAS, and Culvertmaster.
- <u>Structural Design Criteria</u>: The possibility of adding structural design criteria and structural details for constructability to Section 1000 will be explored. Criteria may include a requirement that construction joints are elevated above expected nuisance flow elevations (i.e. 3-inches) in cast-in-place structures.

3.1.11 Section 1100 - Additional Hydraulic Structures

The following updates will be made to Section 1100:

- <u>Stepped Energy Dissipation</u>: Guidance for stepped energy dissipators will be researched and added to Section 1100. Section 1100 guidance will complement stepped spillway guidance for RCC spillways to be added to Section 1200.
- <u>Stilling Basins</u>: Stilling basin design guidance will be updated to follow new guidance available from the US Bureau of Reclamation (USBR).

The following topics will be investigated with the stakeholder group and researched as necessary to determine whether to implement proposed changes and to what extent. Implementation for these items may be included in this scope depending on direction from District and stakeholder group:

- <u>Structure Updates</u>: USBR structures included in the current HCDDM will be updated to reflect current designs from USBR.
- <u>Dissipation Structures</u>: Additional guidance for energy dissipator design when range of Froude number/velocity is outside the recommended range for commonly used designs will be researched for possible inclusion in the HCDDM. Considerations for maintenance access by equipment (not just personnel) will also be recommended.
- <u>HEC-14</u>: Hydraulic Engineering Circular 14 (HEC-14), published in 2006, will be reviewed to determine what information might be able to be incorporated into Section 1100.
- 3.1.12 Section 1200 Detention

The following updates will be made to Section 1200. Note any anticipated changes in policies or required design procedures should be presented to the stakeholder group for consideration prior to finalization of this section:

- <u>Dam Safety/Emergency Action Plans (EAPs)</u>: Clarifications will be added to the Dam Safety section noting exceptions to the 20/20 rule and clear instructions for when a Dam Safety Permit is required. Guidance will be added to discourage development downstream of detention basin spillways and/or provide a clear downstream flow path during spillway operation. A discussion of EAPs will be added and include references to assist consultants with preparation of EAPs when designing detention basins.
- <u>Debris Basins</u>: Specific guidance relative to debris basins, including storage and maintenance access requirements will be added.
- <u>Embankment Slopes</u>: A description of factors that should be considered when designing interior embankment slopes will be added.
- <u>Erosion/Armoring</u>: A discussion will be included to help determine when detention basin side slopes (including embankments) should be lined/armored to prevent erosion.

- <u>Water-level and Weather Monitoring Stations</u>: A discussion of flood stage and weather monitoring stations will be added to the HCDDM that includes a reference to the District's website for additional information on station design details.
- <u>Maintenance/Trash Racks</u>: Maintenance responsibilities for detention basins will be clarified and maintenance and access considerations will be added to the trash rack subsection. A new or cleaner copy of Figure 1204 (Example Trash Rack) will be produced. Trash rack design guidance that considers the debris potential of the upstream watershed will be researched for possible inclusion.
- <u>Multi-Use Detention Basins</u>: ADA considerations for multi-use facilities will be researched for possible inclusion in the HCDDM.
- <u>Root-free Zone</u>: Guidance regarding the root-free zone on embankments will be researched and updated per comments from NDWR Division of Dam Safety.
- <u>Sediment/Freeboard</u>: Detention basin requirements with respect to sediment volume and freeboard will be investigated and standardized for various detention basin types. Compliance with NAC 535.240(5) will be reviewed.
- <u>Sizing Requirements</u>: Minimum clear water storage requirements for detention basins will be clarified, with references to Section 300 added where appropriate.
- <u>Software</u>: HEC-HMS will be added as allowable software per revisions to Section 600.
- <u>Spillways</u>: Spillway guidance will be expanded to include coefficient ranges for orifices and weirs, and standard guidelines and references for labyrinth weirs and stepped spillways will be added.
- <u>Terminology</u>: Detention basin terminology (low flow, principal spillway, auxiliary/emergency spillway, safely pass) will be clarified.
- <u>Water Quality</u>: Water quality design criteria will be updated for clarity. References to water quality design features will also be included and coordinated with reference technical memoranda and Section 1500 as necessary.

3.1.13 Section 1300 – Erosion and Sedimentation

The following updates will be made to Section 1300:

 <u>Universal Soil Loss Equation (USLE)</u>: A working example of the application of the Universal Soil Loss Equation (USLE) will be added to the HCDDM that shows the correct use of the methodology and Figures 1303a, 1303b, 1303c, and 1303d. The figures will be updated for clarity.

The following topics will be investigated with the stakeholder group and researched as necessary to determine whether to implement proposed changes and to what extent. Implementation for these items is not part of the scope:

• <u>Debris Control Structures and Basins</u>: Other possible debris control measures typically used in other areas will be researched for possible inclusion in the HCDDM. The applicability of Tyrolean Weirs to conditions in Clark County will also be considered.

- <u>Sediment Yield</u>: The sediment yield section (1301.7.2) will be reviewed to identify clear guidance/specific criteria that could be added. Unnecessary material will be identified for possible removal (e.g. stochastic methods, physical process).
- 3.1.14 Section 1400 Alluvial Fans
 - The following updates will be made to Section 1400:
 - <u>Methodology Examples</u>: Example problems will be reworked for clarity and to follow revised alluvial fan guidance.

The following topics will be investigated with the stakeholder group and researched as necessary to determine whether to implement proposed changes and to what extent. Implementation for these items is not part of the scope:

 <u>Alluvial Fans</u>: More up-to-date alluvial fan analysis methods will be reviewed for possible inclusion in the HCDDM. This could include the use of FEMA FAN, two-dimensional models (FLO-2D, HEC-RAS 2D, or SRH-2D), or a combination of the two. The FRENCH method outlined in the current HCDDM will be reviewed to determine whether this guidance is still applicable or if it should be removed.

3.1.15 Section 1500 – Structural Best Management Practices

The following updates will be made to Section 1500:

- <u>BMP Applicability</u>: Section 1500 will be updated to clarify whether it applies to all impervious areas of a site or just parking stalls and drive aisles.
- <u>BMP Flow Calculations</u>: BMP flow calculations presented in Section 1502.3 will be compared with flow calculations shown in accompanying charts and updated for consistency.
- <u>Landscape Swale</u>: Criteria for landscape swales will be clarified to include clearer sizing guidance for tributary areas greater than 1 acre.

The following topics will be investigated with the District, subject matter experts, and possibly other relevant stakeholder groups to determine if additional research and/or implementation effort is needed and to what extent:

- <u>LEED</u>: A sub-section on LEED standards and credits summarizing the program, how the points are attained, how they are calculated, and possible drainagerelated applications in Clark County.
- Low Impact Development: Low impact development requirements being requested by various entities will be reviewed to determine whether standardized LID requirements can/should be included in the HCDDM. New LID options and performance standards will also be reviewed to determine if updates to existing guidance are needed.
- <u>MS4 Permit Requirements</u>: Necessary additions to the HCDDM to meet MS4 permit requirements will be identified. These may include peak-urban runoff

discharge rates, site design BMP, source control BMPs, and treatment control BMPs. Any additional requirements associated with impervious area will contain criteria that distinguishes between new development and redevelopment.

- <u>Oil Separators</u>: The performance capability of various oil-water separators will be reviewed to determine whether a performance standard should be added to the HCDDM and what an appropriate standard might be.
- <u>Parking Lot LIDs</u>: The 1.0-acre maximum area for parking lot BMPs will be reviewed to determine whether exceptions should be made, or alternative criteria added for commercial warehouse sites.
- <u>Water Quality Design Storm:</u> Section 1502.3, Water Quality Design Storm, will be compared with the WEF Manual of Practice #23 document for standardization. The need for analyzing a 1-year storm event for the purpose of designing Structural BMPs will be reviewed for possible inclusion in the HCDDM.
- 3.1.16 Section 1600 Local Entity Criteria:

CONSULTANT (ATKINS) will review Section 1600 with the expectation of removing this section from the updated HCDDM. Any content found in Section 1600 which has not been previously resolved during Task 3 will be discussed with the DISTRICT and appropriate local entity(ies) in an attempt to either remove the criteria or relocate into another section of the updated HCDDM. Additional effort needed to complete this subtask may be performed under subtask 3.1.18 as necessary.

3.1.17 General:

The following general updates will be made:

- <u>Hyperlinks</u>: Hyperlinked cross-references will be added to the HCDDM within each section's Table of Contents, and for figures, tables, charts, or other sections that are referenced throughout the HCDDM.
- <u>NRS References</u>: NRS References will be added as hyperlinks throughout the HCDDM.
- <u>Reference Studies</u>: The possibility of creating a digital archive for technical material cited or referenced by the HCDDM update will be discussed with District and implemented as necessary.
- 3.1.18 Technical Resolution

CONSULTANT (ATKINS) will compile a list of unresolved issues collected during Task 3 which require additional clarification, guidance and/or research prior to moving into Task 4: Document Preparation. CONSULTANT will coordinate project meetings with the DISTRICT and selected subject matter experts to resolve these issues. Subtask includes all coordination, research, and technical work necessary to complete Task 3 to begin preparation of a draft HCDDM.

TASK 4. DOCUMENT PREPARATION

4.1 Prepare Draft Document

A draft HCDDM will be prepared based on feedback obtained in Task 3.1. The content included in the draft HCDDM will consist of updates to material and topics already contained in the current HCDDM. Additional sections or topics to be included in the HCDDM will be covered under TASK 6 – Supplemental Services. All changes made will be logged in text and tabular formats to be included with the updated HCDDM. A Bluebeam session (or similar tool) for the draft document will be created and shared with key reviewers to organize and track comments in one central location. **Deliverable:** Electronic version of draft HCDDM.

4.2 Solicit Stakeholder Comments on Draft Document

ATKINS will hold a review workshop that summarizes major comments received during the Bluebeam session and to gather any additional feedback from stakeholders on the proposed changes. For issues requiring feedback from the larger engineering community, the online feedback portal will be utilized as discussed in Task 2.3 and disseminated using communication channels discussed in Task 2.3.

4.3 Prepare Final Document

A final HCDDM will be prepared based on feedback obtained in Task 4.2. Hard copies of the final document will be provided to the DISTRICT along with electronic copies of the document and any technical appendices/backup data.

Deliverables:

- A log of changes made to the HCDDM as part of this update, in text and tabular formats.
- Electronic and 20 hard copies of final HCDDM for distribution
- All backup information in electronic format to the DISTRICT

TASK 5. PROJECT PRESENTATIONS AND TRAINING

5.1 DISTRICT Presentations

Upon completion of the project, CONSULTANT shall prepare for and present up to three (3) presentations to the DISTRICT's committees and Board of Directors for adoption. The following presentations are anticipated:

- Regional Flood Control District Citizens Advisory Committee (CAC)
- Regional Flood Control District Technical Advisory Committee (TAC)
- Regional Flood Control District Board of Directors (BOD)
- 5.2 Training Presentations

Upon completion of the project, CONSULTANT shall prepare for and present a minimum of three (3) half-day training presentations for the anticipated users of the HCDDM.

TASK 6. SUPPLEMENTAL SERVICES

Supplemental services may be performed to complete the update to the Hydrologic Criteria and Drainage Design Manual. Work will only be performed upon approval and the receipt of written authorization from the DISTRICT. Supplemental services may include the following tasks:

- Development of online calculators (e.g. rainfall, CN, lag-time, nomographs, etc.)
- Additional training sessions for anticipated HCDDM users as needed
- Preparation of 2D Modeling Guidance Manual
- Implementation of NOAA Atlas 14 rainfall
- Guidelines for additional return period storms (e.g. 100-year plus, 500-year) and/or storm durations
- Preparation of additional construction design details
- Additional training for Bluebeam (or similar tool)
- Any other tasks pertinent to the project as agreed upon by the CONSULTANT and DISTRICT

CLARK COUNTY REGIONAL FLOOD CONTROL DISTRICT

AGENDA ITEM

SUBJECT:

HOLLYWOOD SYSTEM, CENTENNIAL PARKWAY TO SPEEDWAY #2 DB

PETITIONER: DALE DAFFERN, P.E., DIRECTOR OF PUBLIC WORKS CITY OF NORTH LAS VEGAS

RECOMMENDATION OF PETITIONER:

THAT THE CLARK COUNTY REGIONAL FLOOD CONTROL DISTRICT RECEIVE A REPORT ON THE RECOMMENDATION FOR BEST BID FOR CONSTRUCTION OF THE HOLLYWOOD SYSTEM, CENTENNIAL PARKWAY TO SPEEDWAY #2 DB – NLV03L20

FISCAL IMPACT: None by this action. Funding provided as follows:

\$8,992,662 - Clark County Regional Flood Control District

BACKGROUND:

On April 27, 2021 six (6) bids were opened for the Hollywood System, Centennial Parkway to Speedway #2 DB project. The bids received ranged in cost from \$8,992,662 to \$12,713,654. The recommended best bid is to Harber Company, Inc., dba Mountain Cascade of Nevada in the amount of \$8,992,662 or 4% higher than the engineer's estimate of \$8,636,130 presented to the District Board in September 2020.

The Interlocal Contract dated September 10, 2020 between the District and City of North Las Vegas, allocates \$9,500,000 for the construction of this project. A Cash Flow projection, estimated construction schedule and a tabulation of bids including the Engineer's estimate are attached.

Respectfully submitted,

DALE DAFFERN, P.E. Director of Public Works

SUNSET PARK – DUCK CREEK WASH TO EASTERN AVENUE INTERLOCAL CONTRACT – CLA14X21

Clark County has submitted a request to approve an interlocal contract for design engineering and entity design labor costs in the amount of \$1,630,000 for the Sunset Park – Duck Creek Wash to Eastern Avenue project.

Sunset Park – Duck Creek Wash to Eastern Avenue (DCSP 0000, 0115) is identified in the Regional Flood Control District's Ten-Year Construction Program with design scheduled to begin in fiscal year 2021-2022. This project includes 12' X 5' reinforced concrete box storm drain in Sunset Road from Duck Creek Wash to Tomiyasu Lane and 12' x 5' reinforced concrete box storm drain extending southwesterly through Sunset Park from Sunset Road to Eastern Avenue.

District funding will be provided as follows:

Design Engineering	\$1,600,000
Entity Design Labor	\$ 30,000
Total ILC Value	\$1,630,000

The RFCD Attorney has reviewed the contract.

Staff Recommendation:

Approve subject to approval of the Ten Year Construction Program amendment item on this agenda.

INTERLOCAL CONTRACT FOR SUNSET PARK – DUCK CREEK WASH TO EASTERN AVENUE

THIS INTERLOCAL CONTRACT ("CONTRACT"), made and entered into this day of ______, 2021, by and between the Clark County Regional Flood Control District, hereinafter referred to as "DISTRICT", and the County of Clark, hereinafter referred to as "COUNTY".

WITNESSETH

WHEREAS, pursuant to Chapter 543 of the Nevada Revised Statutes, the DISTRICT may approve a project to design and construct flood control improvements; and

WHEREAS, the flood control improvements proposed herein are generally described in the 2018 Clark County Flood Control Master Plan Update, Structures No⁺s DCSP 0000 and 0115, hereinafter referred to as "PROJECT"; and

WHEREAS, the PROJECT is identified and shown on the attached Exhibit "A"; and,

WHEREAS, the PROJECT has been approved by the DISTRICT on its annual Ten Year Construction Program; and

WHEREAS, the PROJECT has regional flood control significance and is located in the same hydrographic area as the Las Vegas Valley.

NOW, THEREFORE, in consideration of the covenants, conditions, contracts, and promises of the parties hereto, the DISTRICT and the COUNTY agree to the following:

SECTION I - SCOPE OF PROJECT

This INTERLOCAL CONTRACT applies to design engineering and entity design labor costS of improvements associated with the Sunset Park – Duck Creek Wash to Eastern Avenue. The basic improvements shall consist of a 12' x 5' reinforced concrete box storm drain. The improvements shall be funded through DISTRICT funds as herein described. The PROJECT is further identified and shown on the attached Exhibit "A."

SECTION II - PROJECT COSTS

The DISTRICT agrees to fund PROJECT costs within the limits specified below:

- 1. Design engineering in an amount not to exceed \$1,600,000.00.
- 2. Entity Design Labor in an amount not to exceed \$30,000.00.
- 3. The total cost of this CONTRACT shall not exceed \$1,630,000.00, which includes all the items described in the paragraphs above.
- 4. A written request must be made to the DISTRICT and approved by the Board to reallocate funds between phases of the PROJECT. No other approval by the Lead Entity is required.
- A written request must be made to the DISTRICT and a supplemental interlocal contract must be approved by the Board to increase the total cost of the CONTRACT noted above prior to payment of any additional funds.

SECTION III - GENERAL

- 1. The Clark County Regional Flood Control District shall be shown on the title sheet of both the plans and the specifications as the funding agency.
 - The COUNTY will comply with the Local Purchasing Act, Chapter 332, and Public Works Projects, Chapter 338 of the Nevada Revised Statutes.
 - 3. The COUNTY, its employees, and representatives shall at all times comply with all applicable laws, ordinances, statutes, rules, and regulations in effect at the time work is performed on the Project.
 - 4. The COUNTY will require appropriate financial security for the construction of the Project.
 - 5. The COUNTY shall provide all impacted entities and the DISTRICT with the opportunity to provide the COUNTY with input relative to the following processes: scope of services development; consultant selection; design; construction and maintenance review; and monitoring of the effectiveness and impacts of facilities on flood flows.
 - 6. Applicable portions of the current editions of the Clark County Regional Flood Control District Policies and Procedures, the Hydrologic Criteria and Drainage Design Manual, and Uniform Regulations for Control of Drainage adopted by the DISTRICT will apply in developing this PROJECT unless specifically superseded by this CONTRACT.
 - Purchases of right-of-way in excess of that actually needed for construction will not be allowed unless a comparison between the cost of excess acquisition and needed

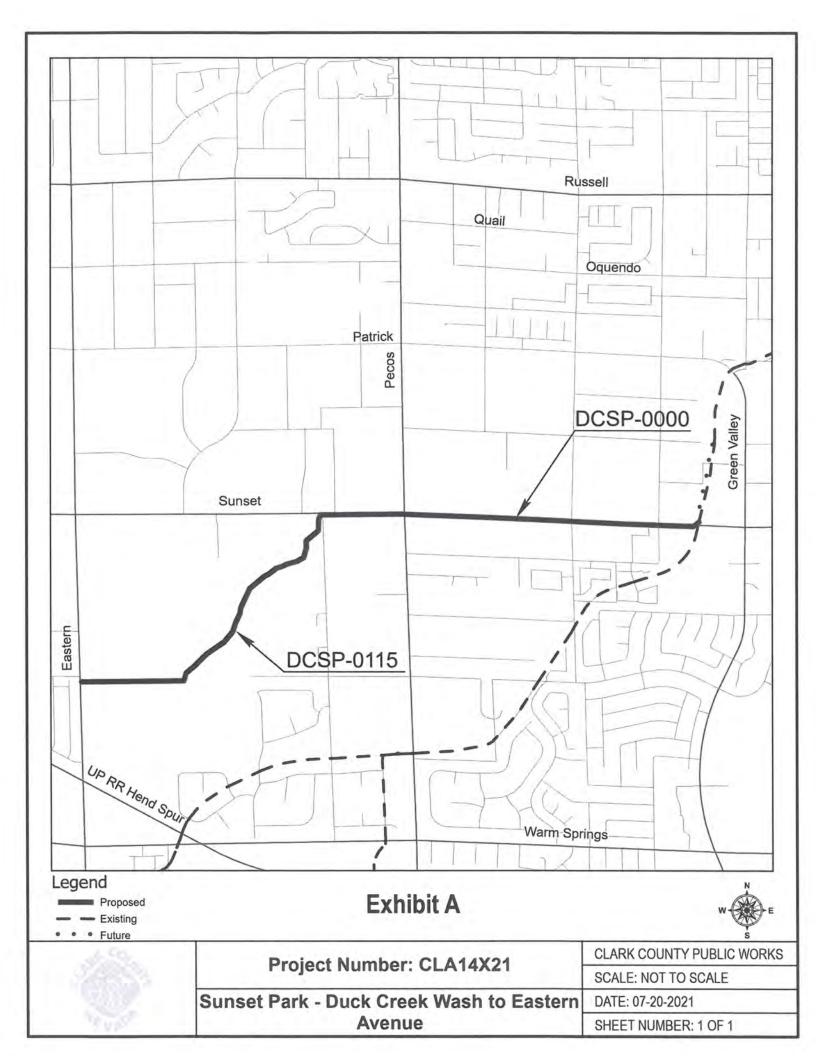

acquisition, including damages, indicates that benefits from such a transaction would result. Title to residual property will be vested in the name of the COUNTY. Revenues derived from the sale of these properties, less the cost of the sale of these properties, will be forwarded to the DISTRICT.

- 8. Administrative settlements and acceptance of counter offers involving right-of-way may only be made following a review and approval by the DISTRICT.
- The DISTRICT will pay the COUNTY, or make payment directly to its contractor or its consultant, each month for PROJECT costs as outlined in SECTION II - PROJECT COSTS. Invoices must identify and allocate all costs to the categories noted below:
 - a. Predesign Engineering
 - b. Design Engineering
 - c. Entity Design Labor
 - d. Right-of-way
 - e. Environmental
 - f. Emergency Action Plan
 - g. Flood Map Revision
 - h. Construction
 - i. Construction Management
 - j. Entity Construction Management Labor
 - k. Landscape Construction
 - I. Other
- 10. Accurate documentation of all work done and payments made will be maintained by the COUNTY for a period of three (3) years in hard copy form after final PROJECT approval and payment. Following the three (3) year period, the COUNTY shall keep records for permanent storage in original form, in microfilm/fiche media, or an electronic format.
- The DISTRICT reserves the right to review and/or audit all records pertaining to all projects both during and after PROJECT completion.
- 12. Up to the limits set forth in NRS Chapter 41, the COUNTY will indemnify and defend the DISTRICT against and from any and all claims and demands of whatsoever nature which arises out of allegations of negligence or misconduct of County officers, employees or agents, related to or under this CONTRACT which results from injury to or death of any persons whomsoever, or against and from damage to or loss or destruction of property.
 - Any costs found to be improperly allocated to the PROJECT will be refunded by the COUNTY to the DISTRICT.

- 14. The items covered in SECTION II PROJECT COSTS must be completed to the satisfaction of the DISTRICT prior to June 30, 2026. The DISTRICT may, at any time thereafter, grant extensions or terminate this CONTRACT after thirty (30) days notice.

15. This CONTRACT may be executed in multiple counterparts, each of which shall be deemed an original CONTRACT and each of which shall constitute one and the same CONTRACT. The counterparts of this CONTRACT may be executed and delivered by facsimile or other electronic signature (including portable document format) by either of the parties and the receiving party may rely on the receipt of such document so executed and delivered electronically or by facsimile as if the original had been received.

INTERLOCAL CONTRACT FOR FLAMINGO, CIMARRON BRANCH – RUSSELL ROAD TO PATRICK LANE

THIS INTERLOCAL CONTRACT ("CONTRACT"), made and entered into this day of ______, 2021, by and between the Clark County Regional Flood Control District, hereinafter referred to as "DISTRICT", and the County of Clark, hereinafter referred to as "COUNTY".

WITNESSETH

WHEREAS, pursuant to Chapter 543 of the Nevada Revised Statutes, the DISTRICT may approve a project to design and construct flood control improvements; and

WHEREAS, the flood control improvements proposed herein are generally described in the 2018 Clark County Flood Control Master Plan Update, Structures No FLCM 0003, hereinafter referred to as "PROJECT"; and

WHEREAS, the PROJECT is identified and shown on the attached Exhibit "A"; and,

WHEREAS, the PROJECT has been approved by the DISTRICT on its annual Ten Year Construction Program; and

WHEREAS, the PROJECT has regional flood control significance and is located in the same hydrographic area as the Las Vegas Valley.

NOW, THEREFORE, in consideration of the covenants, conditions, contracts, and promises of the parties hereto, the DISTRICT and the COUNTY agree to the following:

SECTION 1 - SCOPE OF PROJECT

This INTERLOCAL CONTRACT applies to design engineering, right-of-way and entity design labor cost of improvements associated with the Flamingo, Cimarron Branch – Russell Road to Patrick Lane. The basic improvements shall consist of an 84" diameter reinforced concrete pipe storm drain on the west side of Cimarron Road from Russell Road to Patrick Lane. The improvements shall be funded through DISTRICT funds as herein described. The PROJECT is further identified and shown on the attached Exhibit "A."

SECTION II - PROJECT COSTS

The DISTRICT agrees to fund PROJECT costs within the limits specified below:

- 1. Design engineering in an amount not to exceed \$500,000.00.
 - 2. Entity Design Labor in an amount not to exceed \$10,000.00.
 - 3. CLOMR/LOMR in an amount not to exceed \$10,000.00.
 - 4. The total cost of this CONTRACT shall not exceed \$520,000.00, which includes all the items described in the paragraphs above.
 - A written request must be made to the DISTRICT and approved by the Board to reallocate funds between phases of the PROJECT. No other approval by the Lead Entity is required.
 - 6. A written request must be made to the DISTRICT and a supplemental interlocal contract must be approved by the Board to increase the total cost of the CONTRACT noted above prior to payment of any additional funds.

SECTION III - GENERAL

- 1. The Clark County Regional Flood Control District shall be shown on the title sheet of both the plans and the specifications as the funding agency.
 - The COUNTY will comply with the Local Purchasing Act, Chapter 332, and Public Works Projects, Chapter 338 of the Nevada Revised Statutes.
 - 3. The COUNTY, its employees, and representatives shall at all times comply with all applicable laws, ordinances, statutes, rules, and regulations in effect at the time work is performed on the Project.
 - The COUNTY will require appropriate financial security for the construction of the Project.
 - 5. The COUNTY shall provide all impacted entities and the DISTRICT with the opportunity to provide the COUNTY with input relative to the following processes: scope of services development; consultant selection; design; construction and maintenance review; and monitoring of the effectiveness and impacts of facilities on flood flows.
- 6. Applicable portions of the current editions of the Clark County Regional Flood Control District Policies and Procedures, the Hydrologic Criteria and Drainage Design Manual, and Uniform Regulations for Control of Drainage adopted by the DISTRICT will apply in developing this PROJECT unless specifically superseded by this CONTRACT.

10. Comments By the General Public

A period devoted to comments by the general public about matters relevant to the Regional Flood Control District Citizens Advisory Committee jurisdiction will be held. No vote may be taken on a matter not listed on the posted agenda. Comments will be limited to three minutes. Please step up to the speaker's podium, clearly state your name and address and please **spell** your last name for the record. If any member of the Regional Flood Control District Citizens Advisory Committee wishes to extend the length of a presentation, this will be done by the Chairman or the Regional Flood Control District Citizens Advisory Committee by majority vote. All comments by speakers should be relevant to the Regional Flood Control District Citizens Advisory Committee action and jurisdiction.
